COSMODROMES of the world

Jiuquan

酒泉衛星發射中心

Chinese spaceport. It has been operating since 1958. It is located on the edge of the Badin-Jaran Desert in the lower reaches of the Heihe River in the Edzin-Qi Hoshun of the Alashan aimag of the Inner Mongolia Autonomous Region, named after the Jiuquan city district of the Gansu province located 100 km from the cosmodrome.

It is the largest cosmodrome in China (until 1984 - the only one) and the only one used in the national manned program. Also carries out launches of military missiles. The launch site at the cosmodrome has an area of 2800 km².
